

Policy on Tobacco, Alcohol, and Cannabis

Tobacco

The use of tobacco by ABC students, faculty, staff, volunteers, and board members is inconsistent with the ABC Community Rule of Life. The ABC facility is a smoke-free environment. Those who choose to smoke or vape tobacco must follow City of Calgary by-laws and do so at least five metres away from the building. For the convenience and comfort of all campus users, we have created a designated outside smoking area behind the college building.

Alcohol

ABC students, faculty, staff, volunteers, and board members agree to not abuse alcohol. Alcohol is not permitted on campus.

Cannabis

Recreational usage, possession, and distribution of cannabis by ABC students, faculty, staff, volunteers, and board members is inconsistent with the ABC Community Rule of Life. Non-medical cannabis is not permitted on campus.

Members of the ABC community who have a prescription for medicinal cannabis usage will be allowed to use cannabis via smoking as prescribed by their physician in the designated smoking area on campus. They will need to carry appropriate medical documentation on their person and must produce this if requested. Medical cannabis should be in its original packaging. ABC students, faculty, staff, volunteers, and board members who are medicinal users agree to not abuse cannabis.
